Optimize Your Chance of Winning with GrantWorks on Your Team

GrantWorks delivers highly specialized grant application and management services - tailored to the recently enacted Infrastructure Investment and Jobs Act (IIJA) and Broadband Equity Access and Deployment (BEAD) grant program, including community engagement, stakeholder coordination, and digital opportunity planning. These services are provided by veteran telecom industry technical experts dedicated to the management and oversight of broadband grants.

Our Broadband Services Team provides an advisor and partner with the ideal blend of consulting, planning, research, data analysis, mapping, and project management experience for all aspects of broadband deployment grants. **Partner with us to leverage our 50+ years' broadband and telecommunications experience to help your community close the digital divide.**

Broadband Services

GrantWorks helps providers maximize broadband grant funding that can be used to deploy new and expanded network facilities. Our Broadband Services Team provides time-sensitive and critical technical support to identify funding opportunities, assist in community outreach, and handle all aspects of grant compliance and closeout. These services include:

Market Assessment: Data Analysis & Mapping

GrantWorks GIS Analysts provide mapping and data analysis to identify eligible broadband service areas as well as potential areas with disproportionate impacts to identify risks, barriers, and obstacles at the state level.

Comprehensive Grant Application Development

Our top-rated application and implementation team stands ready to assist you with a one-stop solution for broadband deployment applications, including grant writing, research, compiling company data, financial modeling, engineering design, and completion of application.

Digital Opportunity Planning

Through analysis, we will define how severe the barriers to adoption are, including key issues such as awareness, digital literacy, affordability, device availability, and vulnerable populations. We will create and execute campaigns for awareness, education, and training that are unique to each community you serve.

Community Engagement & Stakeholder Coordination

GrantWorks will work with the community on your behalf for all engagement activities. We will actively work with committees, taskforces, and stakeholders to ensure project alignment with local broadband plans.

Grant Compliance & Program Management

Federal grant dollars come with exhaustive conditions and requirements that are often foreign to service providers. Our team will build an audit-ready broadband deployment program that ensures compliance for financial management, labor standards, and environmental assessments.

Broadband Project Management

Once awarded, our team can assist or develop your build plan and continue through construction management, including permitting, Right-of-Way support and easement support. Once the broadband deployment is complete, we can perform site quality assessments, network performance, and capacity validation.

GrantWorks Will Continuously Work With You to Increase ROI by Re-Engaging the Community & Improving Take Rates.

GrantWorks

STRENGTHENING UNDERSERVED COMMUNITIES SINCE 1979.
